Boise Urban Garden School (BUGS)
The Boise Urban Garden School (BUGS) new garden education facility in Komba Park, located near Ustick and Five-Mile roads in Boise, Idaho. The Scope of the project includes an analysis of the effective characteristics of other urban garden schools and creation of fifteen interchangeable signs that can be moved around the garden; we have also created three special signs that have been designed to encourage hands-on, interactive learning.

Ashlynn Goody, Brittany Crewse, Chris Manning
Top Right: This illustration represents the interactive sign for pollination in garden settings.

Above: This example of an interactive sign is found at Bogus Basin Snow School; the crop rotation BUGS sign will be displayed in this manner.

Right: The log will become an interactive learning center with sliding parts that reveal the process of decomposition.

Interactive Signs
